Gowri Shankar Mehanathan
Managing Partner & CEO

Sanakara Narayanan
Production Head

Organisation Profile

Amuse is an integrated manufacturing company, we help product developers, production buyers and OEMs make custom parts as fast as 24 hours. We have a novel approach that's by going digital, sustainable, and additive in manufacturing. We design, prototype and even mass-produce your products all under one roof. Our integrated factory spans over 50,000 Sqft in Chennai with cutting-edge capabilities in industrial HP Multi Jet Fusion 3D Printing, Injection Moulding, and CNC machining. We manufacture over 2 million parts for our 350+ global clients annually.

Products & Services On Display

At GIM 2024, witness our Industry 4.0 strategy in action for aerospace components and discover how we make low-volume production cost-effective. Our expertise lies in manufacturing thin-walled, lightweight and complex components. We will be exhibiting an array of essential drone hardware components such as sub-assemblies, enclosures and covers, battery enclosures, cell holders, end arms, gimbal covers and many more. Our industry product solutions include clamping, connecting, fastening and jigs and fixtures with a hybrid manufacturing approach.

Tarun S Mehta
Founder & CEO

G V Narayan
Senior Area Sales Manager

Organisation Profile

Ather Energy, India's first intelligent electric vehicle manufacturer was founded in 2013 by IIT Madras alumni, Tarun Mehta, and Swapnil Jain. Backed by founders of Flipkart, Sachin Bansal & Binny Bansal, Hero MotoCorp, and Tiger Global. Ather Energy launched India's first truly intelligent electric scooter – The Ather 450 in 2018, followed by their flagship offering Ather 450X, in 2020 followed by the Gen3 of the 450X in 2022. Ather has also installed a comprehensive public charging network, Ather Grid, designed and built in India. With 1500+ charging points across 100 cities, Ather Grid is one of the country's largest fast-charging networks for electric vehicles. Ather completed the Series E round of funding by signing investment agreements amounting to \$128 million with NIIFL and Hero MotoCorp. The company's product line has won 37 awards in the design, automotive, and technology categories. With 86 Indian and international patent applications, 169 trademarks, and 160+ Indian and International design registrations to its name, Ather Energy aims to provide consumers with the best possible ownership experience. Ather Energy currently operates in 120+ cities including Bengaluru, Delhi, Chennai, Hyderabad, Pune, Jaipur, Kochi, Ahmedabad, Mumbai, Mysore, and Kolkata.

Dr Ian Scrimgeour
Senior Executive Director

Janaki Sreeram
Policy Research Analyst

Organisation Profile

The Northern Territory Department of Industry, Tourism and Trade's vision is to support achievement of a \$40 billion economy by 2030, by balancing robust and efficient regulation, and sustainable and competitive industry growth strategies. The department supports industry development through globally competitive strategy, policy and promotion and delivers a regulatory framework that enables responsible growth, market access and stakeholder certainty. The department's Northern Territory Geological Survey (NTGS) is the custodian of knowledge and data on the Northern Territory's geology and resources, and undertakes activities to support and grow the minerals and energy exploration sector. The Northern Territory has numerous emerging projects for mining and downstream processing of a range of critical minerals including lithium, rare earths, graphite, cobalt, phosphate and copper. The Northern Territory Government can assist Indian companies to identify potential projects for investment, joint ventures or offtake of critical minerals.

Organisation Profile

Chakradhara Aerospace and Cargo Pvt Ltd was established in 1968 as LTE and in 2004 ventured exclusively into AEROSPACE business. CACPL – Aerospace Division (earlier LTE) expertise in Pressure Sensors, Accelerometers, Solenoids, Torque Motors, Actuators, Control Valves & Modules and Precision Machining Components for Space. Our in-house facilities for design & development, machining, special process, assembly & testing under one roof made us to facilitate our customers by delivering our products & services with utmost quality and on time deliveries. With the technical support & guidance from ISRO, CACPL has delivered more than 2500 sets of Control system Components for multiple missions. Since our inception of Aerospace business we are part of all the ISRO's launches and we are continuing our successful association with multiple business units of ISRO over the past 17 Years. We are privileged to be associated with ISRO's special missions like Chandrayaan, Mangalyaan and the on-going nation's prestigious human space program "Gaganyaan". With the technical expertise from ISRO projects, CACPL – Aerospace Division extended its business presence into Aviation segment both Defence and Civil sectors. Realised many precision systems, sub-system and high precision components for Indian and International customers. These include, Solenoid Valves, Flow Control Valves, Gimbals for Electro-Optic Payloads, Power Take-off Shafts for LCA and Retractable Landing Gear Systems for UAV's.

Products & Services On Display

We are privileged to display the parts in TNGIM 2024. These are the parts displayed during the event. UAV Landing Gear - The Retractable Landing Gear System consists of a hydrogas shock strut integrated with wheel and brake system. It absorbs and dissipates landing impact load to safeguard the aircraft. Power Take-off Shaft - PTO shaft can transmit very high peak starting torque and high rpm. couples the Engine mounted accessory gear box with Aircraft mounted accessory gear box. Flow Control Valves - The valves supplied by Chakradhara Aerospace served as the nerve center of all stages, ensuring efficient and reliable functionality during the launch sequence. Electric Fuel cock - EFC is an interface between the fuel supply tank and the engine fuel input. The primary function of EFC is to energize and open the valve during ground run and to close the valve during engine shut down.

Organisation Profile

Alliance Française of Madras was established in Chennai in 1953. Alliance Française of Madras is the premier Indo-French cultural centre promoting culture and teaching French language. Alliance Française of Madras offers a wide range of French courses and services for all the public (children, teenagers and adults) and for companies and institutions. All our teachers are certified French speakers and specialised in teaching French as a foreign language. Alliance Française of Madras, is the examination center for DELF/DALF and e-TEF. VISION Alliance Française of Madras is a cross disciplinary cultural center and a teaching center offering a wide range of French courses and cultural events. It seeks to organize activities promoting civic, social, and environmental responsibility.

Products & Services On Display

Alliance Française of Madras will be bringing an exhibition called "Midi Minuit" - An infinite cycle between day and night. It is an Augmented Reality (AR) exhibition that overlays digital information and artwork by French artists. It can be experienced by an application created by Aurélien Jeanney from "Maison Tangible". AF Madras will also bring A Virtual trip "Paris behind the scenes" where the visitor will be able to visit 6 Parisian sites (The Seine, The Eiffel Tower, The Musée d'Orsay ...) with VR Casques. If you are looking for French courses (general French course and certification, spoken French Workop, intercultural workshops....) or certified translation, our team will be there to answer your questions.

Organisation Profile

Funk Foods is a 'Func'tional foods startup, founded and operational in Chennai, India, with a vision to help people get real (and really good!) food that's: Clean & Wholesome Convenient & Practical Compromise-free in every possible way Funk Foods was founded by Prasanna Natarajan, a serial entrepreneur from Chennai and Shreyas Raghav, a banking & technology veteran, and they lead a team of 35+ who operate primarily out of a state-of-the art production facility in Maraimalai Nagar. Here, they focus on ground-breaking fundamental research to create new food products and concepts, supporting and working with local communities for sourcing of raw materials, marketing the brand to India as a proud brand from Tamil Nadu, and taking it global as a truly Indian innovator in the food industry. The first product launched from Funk Foods in November 2022 was Chutnefy - the 5-second chutneys. Chutnefy is a celebration of the world's favourite Indian Condiment, made with the desire to make life easier, without any compromise in taste, quality or nutritional value.

Products & Services On Display

Funk Foods also has a range of unique hot products like a ready-to-mix Sambar, Vada Curry and more, as well as the recently launched 100% clean Soups. Chutnefy is currently available in 6 cities across South & West India, and is sold online across India. It is also available in Singapore, United Kingdom, USA and soon in Germany, South Africa, Malaysia and Canada. An entire new range of global and Indian products are expected to be launched in Q1 2024

Products & Services On Display

Hyundai created NEXO, the first dedicated fuel cell electric vehicle, because we're committed to a connected, free, and clean tomorrow. One in which vehicles co-exist with us and our environment, liberate us from constraints and make a big impression – without making a sound, or leaving a mark. It's all driven by a simple philosophy. That from this moment everything we do is because of you. NEXO produces zero emissions, purifying the air instead of polluting it. NEXO's hydrogen fuel cell engine generates electricity by mixing oxygen with compressed hydrogen to create a flow of electrons. It's intelligent, efficient, and only emits pure, clean water. NEXO won't change life for the next generation of motorists – it'll change life as we know it.

Organisation Profile

Hiroshima prefecture is one of Japan's leading industrial clusters, with a variety of industries concentrated in the area. In addition to its strong manufacturing sector, including automotive-related businesses, we believe that the region's economic structure can be further strengthened by increasing the number of digital players in the future. Hiroshima Prefecture is actively working to attract offices primarily targeting digital companies and to attract highly skilled IT personnel from around the world to Hiroshima. In November 2023, Hiroshima Prefecture and the Government of Tamil Nadu signed a MOU, with the aim of further strengthening economical connections in the future.

Organisation Profile

Meera Laser Solutions, a seasoned organization with a decade of expertise, specializes in tailoring Industrial Laser solutions globally since its inception in 2010. Committed to delivering world-class quality, MLS offers affordable, precise solutions catering to laser technology needs for clients worldwide. Emphasizing innovation and excellence, the company provides R&D facilities, focusing on integrating various laser systems like Fibre, Disk, Nd-YAG, Green, Diode, and CO2 lasers for diverse industrial applications. MLS stands out for delivering engineering value through Standard/Special Purpose Machines and an exceptional service team, fostering increased production through cost-effective automated processes and integration with Robots & CNC machines. Customer satisfaction is paramount, striving for maximum value for money. Notably, MLS's growth is attributed to customer referrals, a testament to superior designs and machine performance. In 2019, Meera Laser Solutions established an independent Research and Development unit, aiming to pioneer scientific and technological leadership in the laser technology industry through evidence-based R&D solutions.

Products & Services On Display

Meera Laser Solutions leads in battery welding expertise, spearheading India's electric vehicle (EV) evolution, with trust from premier clients like Ola, Mahindra, and other top automakers. At GIM 2024, they showcase live robot-based battery welding assembly using laser technology. Robot Laser Welding elevates capabilities with the state of art robotic fiber laser welding cell, ensuring cost savings by reducing weld time, minimizing post-processing (grinding, finishing), and eliminating filler material. This technology enhances weld tensile strength, improving part quality and replacing bending operations for a faster, repeatable process. The result: increased throughput, enhanced accuracy, improved part form, fit, and function, all while reducing labor, optimizing material use, and enhancing aesthetics. Battery welding seals battery shells with busbars, a technique embraced by industry giants like Ola, Mahindra, and RE. Meera Laser Solutions stands at the forefront, driving innovation and excellence in EV manufacturing

Organisation Profile

Raptee is a full-stack electric motorcycle startup with a very strong technical moat, founded in 2019 by four engineers from Chennai (Ex Tesla, Wipro), working on bringing a no-compromise upgrade motorcycle to an otherwise scooter-only EV market. With a 70+ member team, we bring in a portfolio of 45 patents (and counting), working towards developing an electric motorcycle for consumers in the largest motorcycle market in the world. The company aims to offer customers a premium experience with cutting-edge technology products and passionate people throughout the customer's journey. We are the first EV motorcycle to -have a HV Drivetrain (Patented), have an onboard charger and be compatible with public charging standards (CCS2). Our vision is to LEAD THE TRANSFORMATION TO SUSTAINABILITY With world class products and futuristic experience . Our Mission is to Innovate to improve our customers? journey with us. Innovation is at the core of everything we do.

Products & Services On Display

Our top-notch vehicle outpaces traditional gas vehicles, boasting a top speed of 135 kmph and an impressive 150 km range with its cutting-edge High-Voltage Drive-Train. Ensuring safety is paramount, our ride features efficient active and passive safety monitoring systems—making each journey not just enjoyable but also incredibly secure (with 5X better thermals and a theoretical fireproof design). The battery is a low-maintenance marvel, with a lengthy lifespan of 8 years or 1.5 lakh kms. Every component is meticulously crafted in-house, tailored for the diverse terrain of Indian roads. We proudly present a product made in Madras, crafted for the global stage.

Organisation Profile

DBS is a leading financial services group in Asia with a presence in 19 markets. Headquartered and listed in Singapore, DBS is in the three key Asian axes of growth: Greater China, Southeast Asia and South Asia. The bank's "AA-" and "Aa1" credit ratings are among the highest in the world. Recognised for its global leadership, DBS has been named "World's Best Bank" by Global Finance, "World's Best Bank" by Euromoney and "Global Bank of the Year" by The Banker. The bank is at the forefront of leveraging digital technology to shape the future of banking, having been named "World's Best Digital Bank" by Euromoney and the world's "Most Innovative in Digital Banking" by The Banker. In addition, DBS has been accorded the "Safest Bank in Asia*" award by Global Finance for 15 consecutive years from 2009 to 2023. Additionally, DBS Bank was ranked among the top 3 on Forbes' list of the World's Best Banks in India for three consecutive years, from 2020 to 2022. DBS Bank has been present in India for 29 years, opening its first office in Mumbai in 1994. DBS Bank India Limited is the first among the large foreign banks in India to start operating as a wholly-owned, locally incorporated subsidiary of a leading global bank. DBS provides a range of banking services for large, medium, and small enterprises and individual consumers in India. In November 2020, Lakshmi Vilas Bank was merged with DBS Bank India Limited. The bank now has a network of ~530 branches in 19 Indian states. As a bank born and bred in Asia, DBS understands the intricacies of doing business in the region's most dynamic markets. DBS is committed to building lasting relationships with customers, as it banks the Asian way. Through the DBS Foundation, the bank creates impact beyond banking by supporting social enterprises: businesses with a double bottom line of profit and social and/or environmental impact. DBS Foundation also gives back to society in various ways, including equipping communities with future-ready skills and building food resilience.

Organisation Profile

Everest Links Pte Ltd is a leading provider of medical equipment and devices across Singapore and Malaysia, with ISO13485 and SS 620 GDPMDS certifications. With 15 years of experience in Oncology, Infectious Disease, and Allergen diagnostics, we offer Point of Care Medical Solutions that meet the highest standards of quality and safety. As a pioneer in Oncology care, Everest Links invests in the latest technologies in medical isotopes and radiopharmaceuticals, focusing on both Alpha and Beta emitting Theranostics. Our expanding portfolio includes the supply of vital medical isotopes such as Actinium-225, Lutetium-177, Gallium-68, Copper-67, and more. Everest Links is committed to excellence, innovation, and improving healthcare outcomes. Besides our core competencies, Everest Links has also diversified into manufacturing oximeters. Our oximeter is compact, simple, and reliable, and trusted by hospitals in Singapore. We demonstrate our dedication to delivering cutting-edge and dependable medical solutions by conducting in-house manufacturing of niche medical instruments, ensuring accuracy and quality throughout the production process

Organisation Profile

Established in 1978, Wah & Hua Pte Ltd in Singapore aims to lead the waste management industry in Asia with the latest technologies of products and services. Wah & Hua Pte Ltd – a multi-material recycling and waste Management Company that provides service for the collection of recyclables materials from small business to large corporations. Founded by Steven Tan, recycling at that time was a new concept with relatively little support from business or government. However, Steven as they would come to be known throughout the industry, believed recycling to be one of the emerging opportunities of the 90's. Armed with an old garbage truck and determination, Steven began collection previously discarded materials from a variety of business sources. Learning on the fly, Wah & Hua Pte Ltd has grown from a one-truck team into a sustainable recycling business. We have the capability to provide a full range of waste management services to complement our services and recycling.

Business Development

Organisation Profile

Raptee is a full-stack electric motorcycle startup with a very strong technical moat, founded in 2019 by four engineers from Chennai (Ex Tesla, Wipro), working on bringing a no-compromise upgrade motorcycle to an otherwise scooter-only EV market. With a 70+ member team, we bring in a portfolio of 45 patents (and counting), working towards developing an electric motorcycle for consumers in the largest motorcycle market in the world. The company aims to offer customers a premium experience with cutting-edge technology products and passionate people throughout the customer's journey. We are the first EV motorcycle to -have a HV Drivetrain (Patented), have an onboard charger and be compatible with public charging standards (CCS2). Our vision is to LEAD THE TRANSFORMATION TO SUSTAINABILITY With world class products and futuristic experience . Our Mission is to Innovate to improve our customers? journey with us. Innovation is at the core of everything we do.

Products & Services On Display

Our top-notch vehicle outpaces traditional gas vehicles, boasting a top speed of 135 kmph and an impressive 150 km range with its cutting-edge High-Voltage Drive-Train. Ensuring safety is paramount, our ride features efficient active and passive safety monitoring systems—making each journey not just enjoyable but also incredibly secure (with 5X better thermals and a theoretical fireproof design). The battery is a low-maintenance marvel, with a lengthy lifespan of 8 years or 1.5 lakh kms. Every component is meticulously crafted in-house, tailored for the diverse terrain of Indian roads. We proudly present a product made in Madras, crafted for the global stage.

Mercy
Sales Manager

Organisation Profile

Surinova is an innovation driven organization that focuses on providing pragmatic business solutions to the farming sector. While the current innovative efforts by many corporates and organizations focus on mechanization, Surinova focuses on automation. At present, most of the agro solutions are man-driven-vehicle oriented, while Surinova's solutions focus on wire-driven-remote operation. Surinova also ensure the products do not pollute the environment by using fossil fuel. Ours is a clean energy solution that uses batteries.

Products & Services On Display

Surinova's Tea Rover is a perfect synergy of Robotics, Mechanical Engineering, and Artificial Intelligence. T-Rover is designed to maneuver the sloppy terrain up till 30 degrees. The sensors and controllers ensure the equipment stands to its ground and navigate with élan. The precision engineering augmented by strong sensing capability, senses the top most layer of tender leaves that are suitable for processing and cultivates them. Being an e-vehicle, the equipment saves not only the skyrocketing fuel cost, but also the serene plantation environment from fossil fuel pollution.

TNGCC is a first of its kind ambitious initiative by the State Government and acts as a Special Purpose Vehicle (SPV) to address the climate challenge in the State.

Products & Services On Display

The elephant sculptures are made from Lantana Camara, one of the most invasive plant species in the world that has choked a large part of India's wildlife forest impacting the feeding and hunting grounds of animals particularly elephants. Elephant conservationists have come up with the unique idea to design elephants using Lantana to highlight the threat to Asian elephants. Handmade in the Nilgiris, the toys are made from the wood of the invasive species Senna spectabilis. They help bring awareness to these enigmatic animals and plants of our land.

Organisation Profile

XITE Create is an initiative by the founders of Vajra Global Consulting. It was born out of the need to help organisations that do not have the capabilities to explore, experiment, and incorporate GenAI into their business landscape. Our experts can bridge the gap and enable businesses to face the future with confidence.

Products & Services On Display

We use GenAI responsibly while ensuring information security. Generative AI has cross-functional implications and will fundamentally change the way your business operates. It has tremendous potential and unforeseen impact, and we can help you identify both. What we can do: * GenAI Assesment * GenAI Labs * GenAI Services
